# LISTEN TO THE LAKE...

Official Newsletter of the Keuka Lake Association

### A Message from the President...

WINTER 2024

BY: ROB DINTRUFF

As 2024 draws to a close, the KLA Board of Directors and Officers are taking the time to reflect on the past year and create goals for the year ahead. While each year brings changes and challenges, we remain focused on our mission of preserving and protecting Keuka Lake.

**Maintaining the water level** within a predetermined range is a challenge as we experience more frequent drought and extreme precipitation events. The KLA is consulted as actions are taken by others to adjust the outflow at the control gates in Penn Yan. Mother nature controls the inflow which is not steady and hard to predict. Experience in managing the outflow is a critical contribution of the KLA.

Lake water sampling and testing by the KLA, in cooperation with others, has consistently demonstrated that Keuka Lake is one of the cleanest lakes in the state. Nutrient and bacteria levels have nearly always been acceptable, but that is only part of the story. The vast volume of Keuka Lake's water reduces the concentration of contaminants flowing into the lake, but we know that "dilution is not the solution". Thus, the KLA is shifting focus and also sampling water from major streams to discover potential sources of contamination and take appropriate actions.

**Harmful Algal Blooms (HABs)** were more prevalent throughout the Finger Lakes this year. Why? Warmer spring weather? More nutrients? Calmer waters? Undoubtedly it is a combination of many factors. Our experts also tell us that new forms of cyanobacteria have evolved that can survive in cooler temperatures. The KLA and others study HABs so that we can understand them better and learn how to deal with them. Numerous dedicated volunteers assist the KLA in finding and reporting HABs. While the reported numbers indicate that Keuka Lake has fewer HABs than neighboring lakes, we won't rest on that fact.

**A new law in New York State**, effective in 2025, requires all operators of motorized vessels to obtain a license by completing a boater safety course. The KLA is helping to create awareness and encourage compliance with this new law.

The pursuit of the KLA mission can only be fulfilled with the participation and support of our members, volunteers, and generous donors to this cause. We thank you for your contributions and your trust in us to lead the way through the changes and challenges we face.

On behalf of the KLA and our Board, I wish all of you a happy and healthy holiday season and a joyous new year in 2025.

Roh

LISTEN TO THE LAKE...

PAGE 01

# 2024 AT-A-GLANC

#### LAKE & STREAM TESTING

Our team continuously monitored water quality at several points around the lake and in major streams that flow into the lake. Lake testing results remain stable since starting the sampling over 30 years ago. Streams are being approached with closer scrutiny, as we pay close attention to inputs from the watershed.

#### FECAL TESTING

We began testing for fecal coliform bacteria in the lake and streams in search of potential sources of contamination.

#### HABs SHORELINE MONITORING

Sixty Shoreline Volunteers helped monitor Harmful Algal Blooms (HABs) from May through October in 62 locations. While all Finger Lakes experienced HAB's this season, Keuka has had one of the lowest incidence rates at 15 DEC-confirmed events in 2024. We celebrated our volunteers with an end of season Appreciation Party at LyonSmith Brewing.

#### NAVIGATION & RECREATION

Posted flyers and signs around the lake enforcing the 5 mph within 200' law, which helps protect people and property from speeding boats.

#### ADMINISTRATION

In June, we welcomed our new Executive Assistant, Kate Parsons.

#### ANNUAL GOLF TOURNAMENT

In July, we partnered with Lakeside Country Club, who hosted our Annual Golf Tournament. Proceeds went towards aiding our mission of protecting and preserving Keuka Lake.

#### KLA ANNUAL MEETING

We held our Annual Meeting at Keuka College on July 20th, where we heard updates from our Officers and Committee Chairs, Yates & Steuben County Sheriffs Departments, and the DEC. Our keynote presentation was from Colby Petersen of Yates County Soil & Water Conservation on Watershed Agricultural Projects.

#### LAKE LEVEL MONITORING

Beyond the regular and continuous monitoring of Keuka Lake, we closely consulted with Keuka Lake Outlet Compact (KLOC) to manage the lake level during hurricane Debby in early August and returned lake to normal level within three days.

#### AQUATIC INVASIVE SPECIES REMOVAL

In August, we partnered with PRISM, Yates County Soil and Water Conservation District and Saunder's Museum on an event where volunteers removed 720lbs of water chestnuts from the Keuka Outlet. The KLA recruited volunteers and hosted a relief station with snacks and drinks.

#### COMMUNITY CONNECTIONS

In September, the KLA partnered with Reverb at Point of the Bluff Vineyards to promote sustainable lake living

In November, we enjoyed getting to know our neighbors with a booth at the Downtown Penn Yan Fall Festival.

# Looking Ahead To 2025

### SAVE THE DATES

February 1st- Membership Renewal Begins Monday, July 14th- Golf Tournament at Lakeside Country Club

Saturday, July 19th- Annual Meeting at Keuka College

### KEEP AN EYE OUT FOR:

### Our 2025 Educational Event Series

A new Membership Portal on our website

### WINTER OFFICE HOURS:

Although office hours are typically Monday & Wednesday from 10-2, holidays, meetings and weather may affect availability. Please call before stopping by!

LISTEN TO THE LAKE...

PAGE 04

### EVERYONE IN THE WATERSHED HAS AN INTEREST IN MAINTAINING THE WATER QUALITY OF KEUKA

#### SUE OLIVER, WATER QUALITY CHAIR

Curious people, new members, or perhaps those contemplating membership, visiting the KLA website probably investigate the far-left drop-down menu "about KLA" and select "Our History" to get an idea why this organization was formed. It's a good background article and clearly defines KLA's mission.

The topic that follows, "Area of Focus," is a section that, to me, could use greater definition. Our entire focus is the WATERSHED. Everything that happens to and with the water once those raindrops on the highest hilltops drip toward Keuka (rather than toward Seneca or Canandaigua) ... along the streams, through the groundwater, and whatever they bring with them ... impact the quality of the water in our lake. True, KLA also scrutinizes and stays abreast of lake level, septic issues, boating safety and navigation laws and regulations, because these are all important elements of caring for the lake and maximizing enjoyment for all.

However, Keuka Lake Association is no longer a shoreline association only and hasn't been for many years. Everyone who lives in the watershed is a stakeholder and has a vested interest in maintaining the good water quality of Keuka Lake. Environmental education teaches our children the inter-relatedness of water, business and industry, food, health, economy, and quality of life. The children care about this, and they depend on the adults in their lives to care about it, too.

How often do we take an everyday part of our lives for granted? We value Keuka for its beauty, for the peace and enjoyment it brings, as a recreational resource, for its contribution to our local economy, and, for many, as our source of drinking water. It's right there, but we have busy lives, and we don't always think about how important the lake is to us. We're only human.

It takes all of us to protect this lake we value. Perhaps we could take a moment to reflect on that during this season of gratitude and giving.

If you love the lake as much as we do, please share the KLA with a friend, family member or business in the watershed! KLA Memberships make a great gift. Contact our office to put together a gift package.

LISTEN TO THE LAKE...

### Learn How To Ice Fish

FROM NYS DEPARTMENT OF ENVIRONMENTAL CONSERVATION

Like open water angling, fishing through the ice requires skill and knowledge. But anyone can ice fish successfully if they do their homework. Learning about the water to be fished, the equipment and its capabilities, wearing proper clothing and taking safety precautions are all part of a successful, enjoyable winter ice fishing experience.

Perhaps the best way to get started is to accompany a friend or neighbor on a half-day ice fishing outing. If you are unable to locate someone to go with, the next best alternative is to visit a tackle or bait shop in a popular ice fishing area. The shop owners want you to have a successful and enjoyable trip and can provide you with all the necessary equipment. Ice anglers tend to be a highly social group, eager to share tips, techniques and stories - if you can find one, you can learn a lot.

One of the most important steps to take when ice fishing is to make sure the ice is safe. See the table on the next page for general rules to ice safety.

#### WHAT TO WEAR

It is important to dress in layers. Start with a layer of material that can wick (remove) moisture from your skin. Avoid cotton clothing, which loses its insulating ability when wet. Many wind and water-resistant clothing options are available. Gore-Tex<sup>®</sup> and wool are two good material choices. Bring extra gloves, as they tend to get wet. Wear warm, waterproof boots. Add cleats to your boots to help prevent falls.

#### WHERE TO ICE FISH

Most ponds and lakes offer ice fishing potential. Their characteristics define the kinds of fish that may be caught. Large, shallower ponds and lakes favor species such as chain pickerel, northern pike, yellow perch and sunfish. Deepwater lakes need to be fished selectively to get good catches of northern pike, walleye or lake trout. Brown trout, rainbow trout and landlocked salmon are frequently caught while fishing just a few feet under the ice, even in deep bodies of water.

The local tackle shop where you purchase your bait should be able to advise you on where fish are currently being caught. Online fishing forums are another good resource for choosing your next fishing destination. Regardless of the fish species that you are seeking, concentrations of anglers or the presence of many old holes will provide an indication of areas where good catches have recently occurred.

REMEMBER, USE THE BUDDY SYSTEM WHILE ICE FISHING - IT SAVES LIVES.

#### ICE FISHING REGULATIONS

Ice fishing is permitted on many waters in New York State, but not all. Consult the freshwater fishing regulations for specific waters, as well as the general ice fishing regulations.

#### **ICE SHANTIES**

Ice shanties must be marked on the outside with the owner's name and address in letters at least 3 inches high. Shanties must be removed from all waters by March 15 to prevent them from falling through the ice and becoming hazards to navigation.

#### BAITFISH

Baitfish are commonly used when ice fishing. Make sure your baitfish are certified disease free when you purchase them. Never dump unused baitfish or water from your bait bucket into a lake or pond. Undesirable aquatic invasive species might be mixed in with your bait or bait water. Consult the baitfish regulations before venturing out.

#### ICE SAFETY

Safe ice should be your number one consideration when ice fishing. A minimum of three to four inches of solid ice is the general rule for safety. Ice thickness, however, is not uniform on any body of water. The guidelines presented here are based on new, clear ice on non-running waters. Since ice thickness can vary on a lake, check the ice periodically to stay safe.

#### ICE THICKNESS TABLE (FOR NEW, CLEAR ICE ONLY)

Ice Thickness	Permissible Load
2 inches or less	Stay Off
4 inches	Ice fishing or other activities on foot
5 inches	Snowmobile or ATV
8-12 inches	Car or small pickup
12-15 inches	Medium truck

Note: This guide is based on new, clear ice on non-running waters. Slush ice is about 50 percent weaker. Clear ice over running water is about 20 percent weaker. Double the recommendations for white ice. Many ice anglers do not like to fish on less than five inches of ice, and do not like to drive a pick-up truck on less than 15 inches of ice. Use common sense!

Be cautious in areas where "bubblers" are used to protect docks. They can produce thin, unsafe ice some distance away. Be especially alert in areas near shore, over moving bodies of water, and where streams enter and exit lakes and ponds.

### Winter Water Safety

New York State law requires anyone in a boat that is less than 21 feet long on New York waters to wear a Coast Guard-approved floatation device from November 1 to May 1.

The November to May law is primarily for those who extend the use of their watercraft into the colder season. A life jacket, particularly if it is brightly-colored, helps rescuers locate someone who has fallen into the water and may be at risk for hypothermia. A life jacket extends the opportunity for rescue and survival.

Life jackets are required year-round for children under 12, everyone on a personal watercraft, and anyone being towed by a boat.

#### **ELECTRIC SHOCK DROWNING**

According to the Electric Shock Drowning Prevention Association, Electric Shock Drowning (ESD) occurs when a low-level alternating current (AC) flows through the body with enough intensity to cause skeletal muscular paralysis, preventing a swimmer from staying afloat and ultimately leading to drowning. ESD is more prevalent in freshwater environments than in saltwater, which makes it particularly concerning at freshwater docking facilities, marinas, lakes, and ponds. The typical ESD victim is often a child swimming near a marina or dock where electrical currents may be present. The electricity responsible for ESD typically comes from the wiring of the dock or marina, or from boats or bubblers connected to the power supply of the marina or dock.

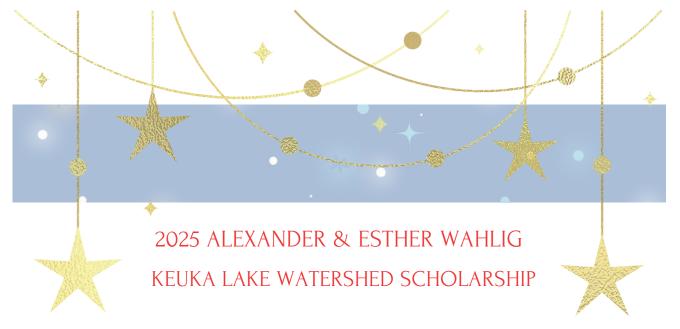

Private Docks: The National Fire Protection Association (NFPA) highlights that ESD hazards can often be overlooked at lakeside homes with private docks. While these homes may not always have shore power, they might have electrically operated boat hoists or bubblers.

Consult a licensed electrician: The NFPA indicates that NEC Section 555.35(C) mandates GFCI protection for personnel at boat hoist outlets not exceeding 240 volts installed at dwelling unit docking facilities.

Stay Safe & Learn more: https://www.electricshockdrowning.org/

The goal of this scholarship, sponsored by the Keuka Lake Association, is to assist a graduating senior high school student who is planning to enroll in a four year program (may include a two year college with plans to transfer to a four year institution) and who is planning on pursuing a career in general environmental sciences or limnology or water quality/watershed management.

Eligible applicants include senior students graduating from high schools in the Keuka Lake Watershed, including Haverling Central School, Dundee Central School, Penn Yan Academy, Prattsburgh Central School, Hammondsport Central School or senior students whose parents are Keuka Lake Association members.

The one-time \$1000 scholarship will be awarded in one installment upon satisfactory completion of the first semester and submission of a transcript sent to the Keuka Lake Association office for review by the committee.

The selection committee is composed of five members appointed by the Keuka Lake Association and will meet in April of the student's graduating year. The committee must receive application forms by April 15th of the graduating year. By June 1st, the committee will send the selected recipient(s) a letter and forward a copy to the guidance department of the appropriate school. Students should submit an application for the scholarship to the Keuka Lake Association by mail to P. O. Box 35, Penn Yan, NY 14527.

The application must include a letter of recommendation from one of the applicant's teachers and a 250 to 300 word essay describing the student's interest in his or her selected field of study and how the student plans to apply that knowledge either in a future career or for enriching his/her appreciation in the environmental sciences or water quality/watershed management. An application is available on our website and it will be included in our March newsletter.

Congratulations to the 2024 recipient, Lexy Wilson!,

### **Creative Ideas for Upcycling Your Christmas Tree**

As the holiday season comes to a close, one common dilemma many face is what to do with the Christmas tree once the decorations come down. Instead of sending your tree to the landfill, why not give it a second life through upcycling? By reimagining your tree, you can contribute to environmental sustainability, enhance your yard, or even create practical items for your home. The Keuka Lake Association encourages everyone to think creatively about how to repurpose their Christmas trees. Here are some eco-friendly and fun ways to upcycle your tree after the holidays:

- Bird Feeder: Hang birdseed-filled pinecones or suet from the branches.
- Wildlife Shelter: Place the tree in a corner of your yard or garden, where it can provide cover for deer, rabbits, and other critters during the colder months. The tree will naturally break down over time, enriching the soil with nutrients.
- Wooden Coasters or Picture Frames: Slice the trunk into thin discs and use them to create coasters, picture frames, or even ornaments for next year's holiday season.
- **Rustic Wall Art:** Cut the branches into smaller sections and use them to create natural, rustic wall art or a unique wreath.
- **Candle Holders:** Use the tree's trunk to create simple, rustic candle holders by drilling holes and inserting tea lights or small candles.
- Use as Erosion Control: If you're near a slope or stream, a Christmas tree can help prevent soil erosion. By bundling several trees together and placing them along the bank of a waterway or on a hill, you can create a barrier that will reduce the impact of wind and water erosion.
- **Compost It:** If you have access to a composting facility or compost bin, breaking down your Christmas tree into smaller pieces can contribute valuable organic material. The needles, branches, and bark are rich in carbon, which helps balance your compost and can be added to your compost pile in the spring.
- **Tree Recycling Events:** Check with local waste management services or your town's parks department to see if they are hosting any tree recycling events. Many municipalities offer tree recycling services, turning old Christmas trees into wood chips, mulch, or compost, which can be distributed to public parks and community gardens.
- **Potpourri:** Dry the pine needles and combine them with other dried flowers or herbs for a homemade potpourri.
- **Essential Oils:** Distill pine needles into essential oils and use them for homemade candles, diffusers, or personal care products.

Upcycling your Christmas tree is a meaningful way to extend its life and reduce waste. Whether you create a sanctuary for local wildlife, enrich your garden, or try your hand at crafting, there are endless possibilities for reusing your tree in creative and sustainable ways. By upcycling, you help ensure that the natural beauty of the Finger Lakes region remains protected for generations to come.

# **KLA DIRECTORS & OFFICERS**

The KLA is always looking for individuals who share our passion for protecting the lake! Email Resumes to info@keukalakeassociation.org.

### The advertising section of the KLA newsletter is provided as a service to KLA members only.

The ads are restricted to 1/4 page, to fit into a 3.75 x 4.75 space. It is the responsibility of the advertiser to contact the KLA office with a request for ad space in an upcoming issue and send a print-ready, color ad in a JPG format only.

The deadline for the Spring 2025 issue is FEBRUARY 10th and will be accepted in the order submitted. However, in an attempt to present an interesting diversity of ads, the KLA editorial staff reserves the right to limit the number of any specific type of ad in any given issue. KLA also reserves the right to decline acceptance of an ad deemed inappropriate for the publication.

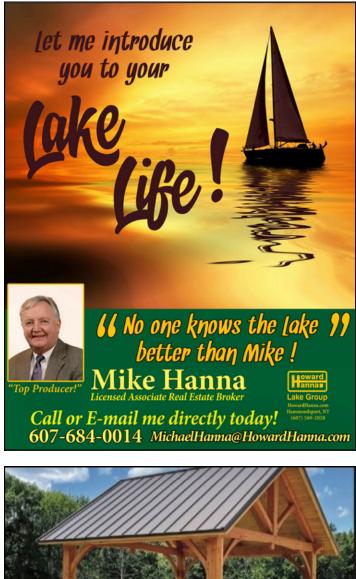

Established 1962

Four Generations Family Owned

Open Year-Round 10 am - 5 pm

DR. KONSTANTIN FRANK WINERY 9749 MIDDLE ROAD, HAMMONDSPORT NY 1-800-320-0735 | WWW.DRFRANKWINES.COM

Thank you to all our 2024 Advertisers! We appreciate your ongoing support. Information about advertising with us in 2025 will be sent to all business members in January. Please contact our office if you are interested in becoming a member!

THE KLA OFFICE IS LOCATED AT: 2466 NY-54A, SUITE 207, PENN YAN, NY

Open hours fluctuate, so please make arrangments ahead of time if you'd like to stop by!

> Boating Safety Classes at Steuben County Sheriff's Office December 14th 8am-5pm January 4th 8am-5pm February 8th 8am-5pm

> > 2025 CALENDARS AVAILABLE:

LONGS', ARTS CENTER OF YC, BROWSERS, CROOKED LAKE MERCANTILE, HUNT COUNTRY, VINEYARDS, PARK PHARMACY, CINNAMON STICK

KLAeidoscope of Keuka 2026- Calendar Photo Contest YOUR PHOTO COULD BE IN THE 2026 CALENDAR!

Keep your camera handy throughout the year, as photos are needed for all seasons. Photos must be of Keuka Lake or its shoreline, hillsides and communities. Photos must be taken by KLA members or members of their families.

Entries must be received by March 31, 2025. Limit 3 photos per entrant. All photos need to be horizontal to fit a calendar page. Digital photos should be taken with a 3.5 mega pixel or larger camera, at highest possible resolution. You may re-submit photos that were previously not selected. After uploading the image to your computer, save it as a .jpg file, leave it unedited, and visit the 'Gallery' tab on our website to submit through our online form.

Remember, prizes are available for the cover, back, 1st, 2nd and 3rd place photos and selected submissions receive a copy of the calendar. Photos not selected for use in the calendar may be placed in the photo gallery on the KLA website or in the newsletter. Past entries may also be considered for use in future calendars.
